MOST GASE

GLOBAL

TALENT

INTERNSHIP

PROGRAM

The annual Global Talent Internship Program (GTI Program) hosted by the Ministry of Science and Technology Center for Global Affairs and Science Engagement (MOST GASE) offers young talents an incredible opportunity to gain deeper understandings of Taiwan's innovative science and technology development.

01 LAB/CORPORATE INTERNSHIP

To build professional networks and engage in multidisciplinary research, participants will be assigned to different leading universities and national research labs in Taiwan. Aside from academic research, participants will have the option to intern at selected corporations to gain practical experience in the professional work environment.

Through peer-to-peer learning, participants will receive guidance and career-related advice from experienced experts and professionals, and have the opportunity to work with local students as well as fellow program participants. Our program allows participants to enhance professional skill sets to pursue their successful career path.

02 FEATURED SPEECHES

by distinguished scholars and experts

To prepare participants with comprehensive background knowledge of the focus topics, the program offers introductory lectures by distinguished scholars and experts from Green Technology and Biotechnology fields.

03 CORPORATE VISITS

practical learning and professional experience

Exclusive visits to prominent corporations offer participants a unique insight to Taiwan's innovative industries. Through face-to-face conversation with outstanding entrepreneurs and scientists, this insider experience will help bring the theoretical learning into practical training for the participants.

04 LANGUAGE & CULTURAL EXPERIENCES

embrace the beauty of Taiwan

To help our participants fully embrace the local culture and explore the beauty of Taiwan, special Mandarin courses on basic conversations and a wide range of cultural activities will be arranged.

SUSTAINABILITY

GREEN TECHNOLOGY

&

SMART HEALTHCARE

BIOTECHNOLOGY

In present day, the environment is racing towards the tipping point where we would have done permanent damage to the planet earth. The year 2020 has brought unforeseen challenges to the earth, which placed our entire world at halt, and is still awaiting recovery. However, it is also the year that has also brought massive technological advancements, specifically in the areas of Green Technology (Sustainability) and Biotechnology (Smart Healthcare). Taiwan has and continues to work tirelessly to find solutions for climate problems. On the other hand, Taiwan has done an exceptional job in minimizing the impacts of the pandemic in the country. With that said, for the 2021 GTI program focuses on the topic of Green Technology (Sustainability) and Biotechnology (Smart Healthcare). We hope that by sharing our pioneering technology achievements with aspiring talents could bring out more ideas to inspire the next generation of tech leaders, and for them to work together for a more efficient and sustainable future.

DATE 28 JUNE - 25 AUGUST 2021

(8 weeks in total, with 7 weeks lab/corporate internship)

FEES

- The **program tuition fee** will be provided by MOST GASE.
- **Accommodation during 28 June - 4 July (6 nights) & 23 -25 August (2 nights)** will be provided by MOST GASE.
- A set amount of accommodation fee during **4 July - 23 August** will be subsidized by the Ministry of Science and Technology, Taiwan for the amount of NT\$ 43,750 (approx. US\$ 1,500) before tax (18%).
- Participants are responsible for **airfares, visas, meals, local transportation, personal insurance and other personal expenses.**

APPLICATION AND REQUIREMENTS
